Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-5,12-16,19,20,23,24 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16,23,24 are rejected under 35 U.S.C. 102(b) as being anticipated by Horn et al. US PN 4,888,012.

Horn et al. disclose in figures 1-3 an intraocular lens assembly comprising interface element (44), tensing element (web, 50), and a selectively inflatable and deflatable member (12). The len assembly comprises at least three optical surfaces.

Claims 2,17,19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bowald US PN 4,713,072.

Art Unit: 3738

Bowald disclose in lines 39-54 of col. 3, 56-60 of col. 4, and figure 2 an intraocular lens comprising interface element (supporting loops: lines 50-54 of col. 3) and a tensing element 3 which comprises a biodegradable plug as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,19,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horn et al. US PN 4,888,012 as applied to claims 16,23,24 above, and further in view of Bowald USPN 4,713,072.

Horn et al. meet the structural limitations of claims 2, 19, and 20 as described above but lack the express written disclosure of having a biodegradable plug. Bowald teach in lines 23-31 of col. 2 and figure 4 an intraocular lens filled with gel wherein a biodegradable plug (one way valve) is provided to assist filling of the implant. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to include a biodegradable plug as taught by Bowald in order to assist filling of the implant.

Allowable Subject Matter

Claims 1,3-5,12-15 are allowed.
